

Long wing feathers covering the tail

Audouin's Gull's legs are dark greenish-grey

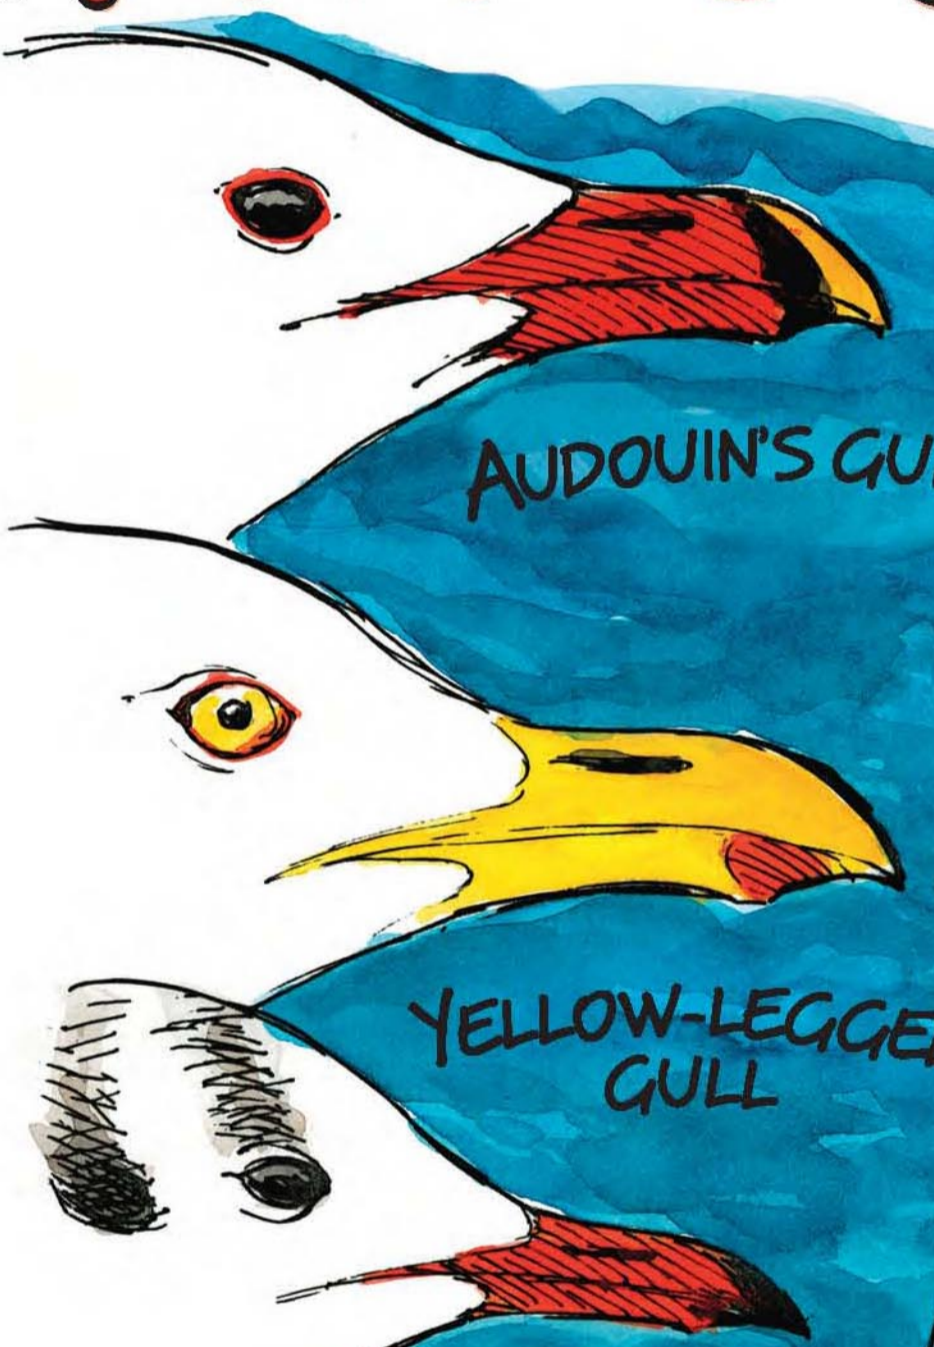

Yellow-legged Gull's legs are yellow

If you find a metal ring, send it to the address engraved on it and you will receive information on the bird's date and place of birth

How do Audouin's Gull fish? Flies just above the water surface... suddenly snatching out a fish with its bill

# AUDOUIN'S GULL

AUDOUIN'S GULL

YELLOW-LEGGED GULL

BLACK-HEADED GULL (with winter plumage)

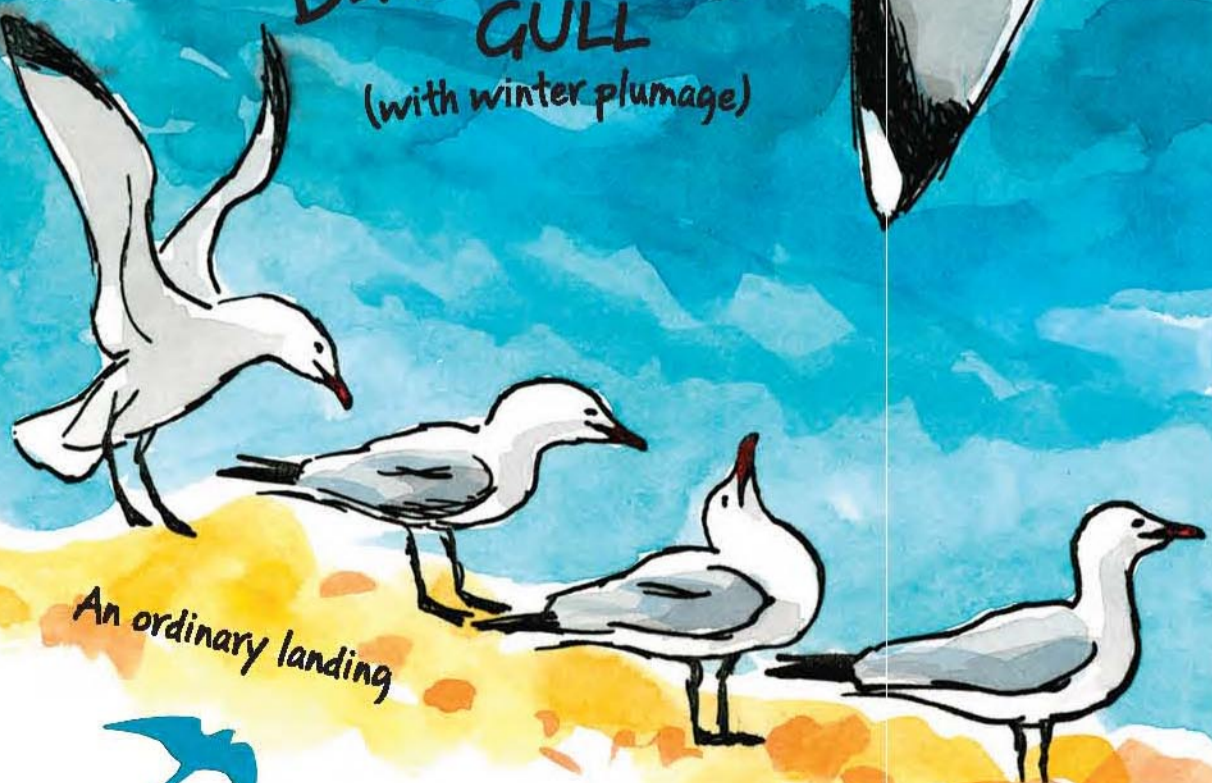

Fledglings heads are covered with down, while the rest of the body is covered with a dark-colored plumage

Preens its feathers with its bill

Calls and throws its head back and forth in order to chase away other individuals from its nest

An ordinary landing
